Subject: 5042-33, Compliance with 2008 Risk Mitigation Decision (RMD) for Ten Rodenticides, 5042-33
Date: 03/29/2011 10:28 AM

Dear Ms. Boone,

- The registrant needs to comply with the 2008 RMD.
- As agent, you will need to submit an amendment, electronically if possible, as I am working under an April 4 deadline.
- I also have to review the label to determine if it meets current requirements.

5042-33, RMD Labeling Requirements

While the May 28, 2008, Risk Mitigation Decision (RMD) for Ten Rodenticides does not require changes in bait form, bait stations, package sizes, label sites, or store types for

unclassified mole and pocket gopher products applied underground by hand,

Page 36 of the RMD requires three label changes to insure that applicators are aware that

the label only allows use of such products for sites, pests, and application methods described on the label.

To comply with the RMD, make the following three changes to your label:

1. Immediately under product name, add this text:

This product may only be used to control [moles and/or pocket gophers] in manual, below-ground applications."

2. In the "Use Restrictions" in the "Directions for Use", include this text:

This product may only be applied at the use sites and by the application methods indicated on this label. Bait must be applied directly into [mole and/or pocket gopher] burrow systems.

If you need any assistance, please contact me.

Thank You,

Daniel B. Peacock, Biologist
